SYMJEPI (epinephrine injection, USP) pre-filled syringe
For Allergic Emergencies
(Anaphylaxis)

Read these instructions for
Use carefully before you use
this product.

Before you use your
SYMJEPI syringe, make sure your
healthcare provider knows you the
right way to use it. Parents,
caregivers, and others who may be
in a position to administer
SYMJEPI should also understand how to use
it. If you have questions, ask
your healthcare provider.

SYMJEPI is a single use pre-filled syringe that delivers a fixed dose
of epinephrine. The pre-filled syringe cannot be reused. It is normal for most
of the medicine to remain in the syringe after the dose has been injected.
The correct dose has been injected if the plunger has been pushed all the
way down and the solution window is at least partially blocked.

If you will be administering SYMJEPI to a young child, ask your healthcare
provider to show you how to properly hold the leg in place while
administering a dose.

After use and Disposal - Hold SYMJEPI with one hand with your
fingers behind the needle and slide the safety guard over the needle until
it clicks. Put the used syringe into the carry case and close the case.
- Take the case with the used syringe with you when you go to see a
healthcare provider.
- Tell the healthcare provider that you have received an injection of
epinephrine. Show the healthcare provider where you received the
injection.
- Give your used SYMJEPI syringe to your healthcare provider for
inspection and proper disposal.

For more information see Patient information sheet or ask your healthcare provider.
How to Store - Keep SYMJEPI in its plastic case nearby
and ready for use at all times.
- Store at room temperature between 48°F to 77°F (10°C to 25°C). Do not expose to extreme cold or heat, for
example, do not store in your vehicle glove box and
do not store in the refrigerator or freezer.
- Store the SYMJEPI syringe in its closed plastic case to
protect from light.

Check Your SYMJEPI Periodically -
The solution should be clear when viewed through the
window on the device. If the solution is discolored
(pinkish or brown color), cloudy or contain particulates,
replace the SYMJEPI with a new one.

Your SYMJEPI Has an Expiration Date -
Expires 2021 12 – December 01, 2021. Replace
SYMJEPI before the expiration date. Dispose of expired
SYMJEPI properly by taking it to a healthcare provider or
hospital emergency room.
